Experience

Founder & Lead Engineer - PeerSky Browser | P2P Labs Feb 2022 - Present

- Leading development of **PeerSky Browser**, a peer-to-peer local-first web browser with **2,000+** users enabling resilient, accessible, and user-owned web experiences.
- Manage engineers and mentor open-source contributors, including **Google Summer of Code** contributors, across protocols, apps, UI/UX, and browser architecture.
- Built and shipped core features including local LLM APIs, support for IPFS, Hypercore, and BitTorrent for decentralized publishing, P2P apps, and web extension compatibility, enabling users to access, communicate, and publish without centralized infrastructure.
- Secured **\$20,000+** in grant funding from Protocol Labs and Gitcoin, driving sustainable open-source development.

Mobile Application Engineer Intern - IdentiKey July 2025 - Aug 2025

- Designed and implemented secure key recovery, P2P onboarding, and verifiable credential flows in a cross-platform React Native app with 4-factor authentication.

Software Developer Intern - okTurtles Foundation June 2025 - Aug 2025

Worked on **Chelonia**, an end-to-end encrypted, open-source, and federated framework built on **Shelter Protocol**.

- Implemented 'chel serve' by migrating 30,000+ lines of JavaScript to TypeScript across 170+ files, transforming the Chelonia CLI backend to a production-ready developer platform.
- Implemented 'chel pin' contract pinning with per-contract pinning capabilities, enabling independent contract lifecycle management and reducing deployment complexity.
- Built a TodoMVC example demonstrating Chelonia's contract architecture, serving as a reference implementation for developers.
- Modernized codebase infrastructure by migrating to Deno 2.0, implementing ESLint standards, and establishing robust CLI command structure.

Software Engineer - Distributed Systems - hypha.coop Aug 2023 - Aug 2024

- Worked as part of the **Distributed Press** team to develop and implement features utilizing a **half-million-dollar** grant funded by **FFDW**, enabling Distributed Press-published websites to engage with the expansive Fediverse community, comprising over **10 million+** users across platforms like Mastodon and PixelFed.
- Played a key role in development and implementation of the **Social Inbox**, a pioneering tool that integrates social interaction capabilities into websites on the decentralized web.
- Implemented ActivityPub standards to facilitate follow requests, replies, and content updates, transforming websites into dynamic social profiles.
- Developed **Social Reader**, a P2P and offline ActivityPub client for reading and following microblogs on the Fediverse.
- Developed **DP-CLI**, a command-line tool enabling publishers to manage and publish decentralized websites, and interact with the Fediverse via ActivityPub.

Independent Web3 Developer, Hackathons Feb 2021 - Jun 2023

- Solo hacker, **10x** Web3 hackathon winnings, **3x** devgrants.

Projects

P2Pmd: A real-time peer-to-peer Markdown editor for writing notes and collaboration, **code**.

PeerChat: A local-first peer-to-peer chat app, **code**.

COVID-19 Vaccine Finder: check the available slots for vaccination centres from coWIN API in India (it was used by **thousands** during the COVID-19 pandemic to find available vaccine slots), **code**.
